Hi! I'm Robert. I'm a big technology fan and try to learn everything software-related. Besides that I'm into chess, books, philosophy, and cooking. Programming is my everyday hobby.

I'm primarily a `C++` and `React` developer. Below, I list all the technologies that I used. Bold means that I was already fluent with a given tool (or very similar); everything else I used and learned on the go.

Experience

- **Tangler:** <https://github.com/robert-dorna/Tangler>

JavaScript Svelte SvelteKit HTML CSS Docker Docker Compose **Python** Flask
CORS Kubernetes Nginx GCP GKE gcloud cli **git**

- **Bodypace:** <https://bodypace.org/app> & <https://github.com/Bodypace/Mobile>

JavaScript React Native **Expo** Apollo GraphQL **Formik** lodash moment **Yup**
Azure: Secrets, CDN, SQL, Webapp Bitbucket pipelines NodeJS FeathersJS
Express.js **SQLite** **Mocha** Docker **MySQL** **Sequelize** Redis **ChatGPT (legal documents)** **GH Pages** **git** **Figma** UML AxiosHTTP HelmetJS Winston dotenv
Socket.IO **Google Play Console** (Server (tools written in *italic*) is awaiting revitalization)

- **Intive 12 months** : Mobile, Frontend & Embedded (I left because of burnout)

JavaScript **TypeScript** **React** React Native Redux + Saga Styled Components
Styled System GraphQL Storybook Formik AWS Lambda **git** **Agile** **Scrum**

- **ESET 13 months** : Junior C++ Backend (Great team and product, I left to try new things)

C++17 T-SQL **MySQL** REST JavaScript React Bootstrap **Sass** LevelDB WinAPI
VMware Docker **Python** **Visual Studio** **git** Agile Scrum

- **POLSL 1 semester & during HS** : Computer Science & Internship & Junior C++
Priced national innovation tournaments during High School : 1st or podium
My own side projects for fun and learning

C++11 Lua Nix OpenCV OpenGL GSL cmake meson googletest googlemock Qt5
boost jupyter pandas numpy scikit arduino blender love2d django java
spring hibernate tomcat Haskell ... (rn with most I'm only familiar, junior in few)
